

**In the works!**

The Central team are working hard to boost recruitment.  
Very soon we will have **updated trial posters** which you can display to your patients.  
We are also planning a new **Google advert** which will bring us more exposure and hopefully more participants.  
Let's keep the momentum going!

**PANORAMIC has recruited  
27,282  
participants**

**Is your GCP training up to date?**

For clinical trials of investigational medicinal products (CTIMPs) such as PANORAMIC, it is a **legal requirement** that each individual involved in the trial should **be qualified by education, training and experience to perform their duties**.  
To comply with this requirement, please ensure that you and your team maintain **up-to-date Good Clinical Practice (GCP) training**. Thank you!

**Virology sub-study**

It is important that participants receive their virology pack on time to start taking their samples.  
If you become aware that a participant's pack **delivery has been delayed**, please notify us immediately by phone or via the trial's main email. (Participant ID only on an email.)

**Next day delivery**

Please remember to **complete randomisations** by the **cut-off times!**  
This will ensure **next day delivery of IMP and virology sub-study packs**.

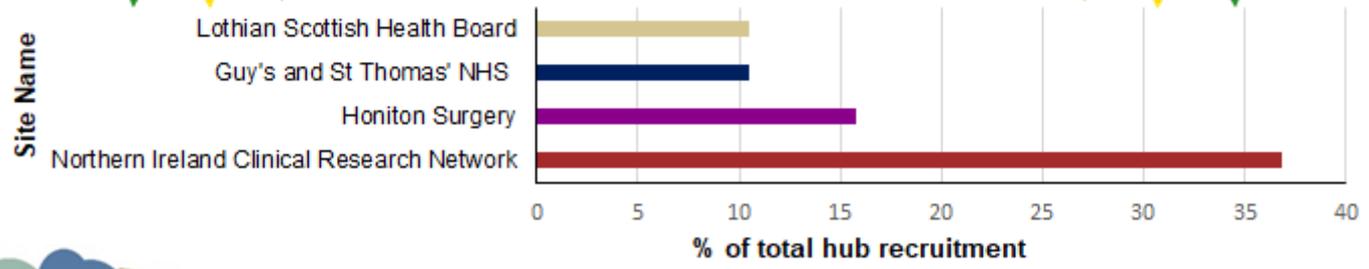

| Study              | Randomisation cut-off times |
|--------------------|-----------------------------|
| Main study         | 4:30 pm                     |
| Virology sub-study | 3:00 pm                     |

**Missed a safety call? Participant took more medication than instructed?**

Our team can help you complete an **Incident form**.  
If you'd prefer to do this yourself, just follow the **Working instructions** and complete **sections 1- 4 of the form**, making sure to include all relevant details such as **participant ID, date and a brief description**. (Please don't include personal identifiers.)  
Then send us the form and we'll do the rest.

**PANORAMIC's top recruiters in May**

**DID YOU KNOW?**

All the **previous issues** of our **newsletter** can be found on our website under the 'For Healthcare Professionals' tab, documents section:
