Symptoms and Side Effects

Participants are finding it difficult to **differentiate** between Covid-19 symptoms and IMP side-effects. With **Fatigue or headaches**, for example, it may be difficult to distinguish whether these are Covid-19 symptoms or caused by the IMP.

Please emphasise to participants that the **initial CRF questions refer to Covid-19** and the **final set of questions** describe their overall health. It is important to differentiate between these two to make sure we collect accurate data.
