

CRN Colleagues – Help us grow PANORAMIC

If you know of any potential hubs or sites who may be interested in furthering their research profile by joining the PANORAMIC trial, please let us know and we will forward them more information.

★ **PANORAMIC** has ★
recruited
26,927
participants ★

Spread the word!

We have promotional materials, including our **poster** and **social media** images, available to download on our **website**, via the Share tab.

Our team would be happy to send you copies of these if needed. Please let us know.

Covid Medicines Delivery Units 
PANORAMIC needs you!

Approximately 20% of patients referred to **CMDUs** for anti-viral treatment are **ineligible** for Paxlovid under CMDU criteria, but **those patients may be eligible to take part in PANORAMIC.**

To learn more about how CMDUs can get involved in PANORAMIC, visit: panoramictrial.org/for-healthcare-professionals/panoramic-cmdu-resources.

New Working Instructions

Two updated working instructions have been disseminated:

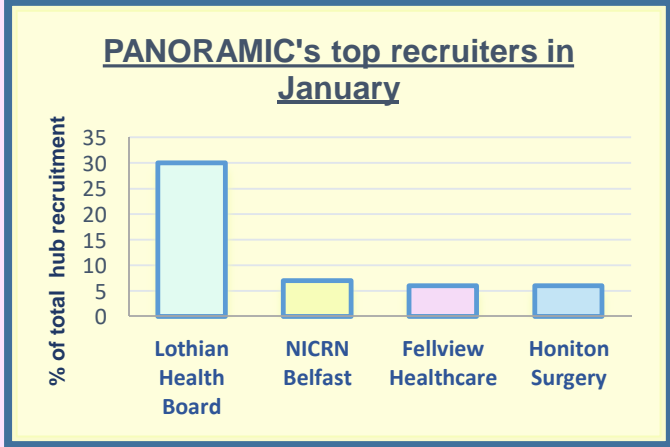

- Pre-Randomisation Call V3.0
- Day 2 Safety Call V4.0

Please share these with your wider team and file in Section 11 of your eISF.

Participant confidential information

A gentle reminder not to send **participant consent forms** or **medical information** to our team when responding to our GP follow-up letters.

Our team can access participant consent forms and basic medical information on our electronic database so **we will not typically ask you to send these forms to us.**

IMP Delivery

If a participant has been randomised to the Paxlovid arm, ensure you explain when they will get their medication pack. The medication pack will be sent using **next day guarantee delivery** and it should arrive **by 1pm.**

Updates and Reminders 

Free LFTs remain available for recruiting hubs/sites. If you are a hub with many spokes and find that you require **extra LFT supplies**, please let us know.
