

Dear ((firstname)),

We are contacting people with a positive COVID-19 test to introduce the PANORAMIC trial. The University of Oxford is running a study of COVID-19 treatments that might help people get better quicker and reduce the need for hospital treatment.

To take part, you must be aged 50 and over, or aged 18-49 with an underlying health condition. You must have had a positive test result for COVID-19 and currently be experiencing symptoms of COVID-19, which started in the last 5 days.

\*These symptoms may include but are not limited to: a high temperature; a new, continuous cough; loss or change to your sense of smell or taste; sore throat; shortness of breath; general feeling of being unwell; muscle pain; diarrhoea and vomiting.

For more information about the trial and signing up, please visit the trial website [www.panoramictrial.org](http://www.panoramictrial.org). If you have any questions, or do not have internet access, please call the PANORAMIC trial team on 08081 560017. You will be asked to answer a few questions and a clinically qualified person will review these and confirm whether or not you are eligible to take part.

Kind regards,
