**PANORAMIC: Platform Adaptive trial of NOvel antiViRals for eArly treatMent of covid-19
In the Community**

Dear

We are writing to thank you for your participation in the PANORAMIC Trial. PANORAMIC is a trial looking at how different antiviral treatments may help to treat COVID-19. By taking part in this trial you have provided invaluable information that we hope will give us a better understanding of the virus.

Without people with your public spiritedness and willingness to contribute to medical research, we would not be able to gain a better understanding of how the virus works and possible treatments.

We are extremely grateful for your commitment and time spent responding to phone calls, and completing the daily diaries. The information collected in your daily diaries is vital for the study. We will use the information you have provided about any hospital visits, your symptoms and how well you have felt to determine how well the antiviral treatments work.

Please also find enclosed a £10 gift voucher as a small token of recognition of your tremendous contribution to the PANORAMIC trial.

As soon as the trial results are available we will publish them on the trial website www.panoramictrial.org. Please do visit the website to see how your contribution is helping to find treatments for COVID-19.

Please do contact us at any time if you have any questions.

With sincere gratitude

Professor Christopher Butler

Chief Investigator
