

The PANORAMIC Trial Virology Instructions Less Intensive Virology Sampled Cohort

Thank you for choosing to take part in the Virology Sampled Cohort.

Within this kit you will find the nasopharyngeal (nose and throat) swabs that you will provide on Days 1, 5 and 14, along with 3 finger prick blood tests which will also be performed on Days 1, 5 and 14.

If you have been allocated antiviral treatment you should take the first nasopharyngeal (nose and throat) swab and finger prick blood sample just before you take your first dose of medication, this is Day 1. If you have been allocated to Usual Care, Day 1 will be the day after you entered the study.

Full instructions on how to perform the swabs and finger-pricks are provided in each individual kit. Please follow the instructions provided.

The samples you collect at home can be posted back to the study team, the necessary equipment, and instructions for this is included in the individual kits which you will receive in the post. We ask that you please post the samples back as often as possible, preferably within 24 hours of collection.

If you forget to take a sample on the day it is scheduled, please take on the next possible day.

Fig 1 Nasopharyngeal Swab Kit

Fig 2 Finger Prick Blood Test Kit

Please record the dates that you collected and posted samples in the sampling schedule below:

Day	Sample to Collect	Date Collected	Date Posted
1	Nose and Throat Swab	___/___/___	___/___/___
	Finger prick blood test	___/___/___	___/___/___
5	Nose and Throat Swab	___/___/___	___/___/___
	Finger prick blood test	___/___/___	___/___/___
14	Nose and Throat Swab	___/___/___	___/___/___
	Finger prick blood test	___/___/___	___/___/___
